

BiomagScience Response to Questions from the Webinar

Thanks to the wonderful folks of Health Revival Partners for providing this BiomagScience webinar.

In responding to the questions from the viewer (below), this site offers a wealth of information, research and testing.

1. **Articles** on what, why and how BiomagScience works are just below the video on the home page.
2. The **BiomagScience Slide Program** in the webinar is under **Media** on the menu.
3. Under **Research** on the site are before and after testing. Clinical and personal responses to many A-Z medical conditions are under Health Conditions on the menu.

Most therapy protocols are in the therapy book ***Conquering Pain, the Art of Healing with Biomagnetism***. The book can be purchased separately but also comes with the [Wellness kit](#).

General daily maintenance and the Advanced Therapies in pictures are in the **Wellness Kit Pictorial Guide**.

The [Wellness Kit](#) comes with everything you need for increased vitality and simple to advanced therapies for most med conditions – a very important first aid kit for every home.

In the kit, the **Blue Instant Reference Card** provides immediate therapy directions to the part of the Wellness Kit for Daily Vitality maintenance (wellness), Pain Relief, Advanced Therapies for Chronic Illness/Disease Malabsorption, EMF Sensitivity

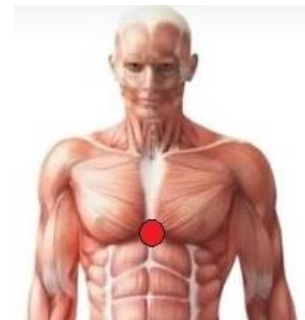

In the following answers, the acronym **ATACC stands for Advanced Therapies for Acute Chronic Conditions**. These step-by-step Advanced Therapies protocol is on page 8 of the Wellness Kit Pictorial Guide. It helps normalize gland, organ, and nerve function while systemically energizing and balancing the body to support wellness and create a healing terrain to support resolving illness or at-site therapies such as joint regeneration.

Answers to Questions made during the Webinar

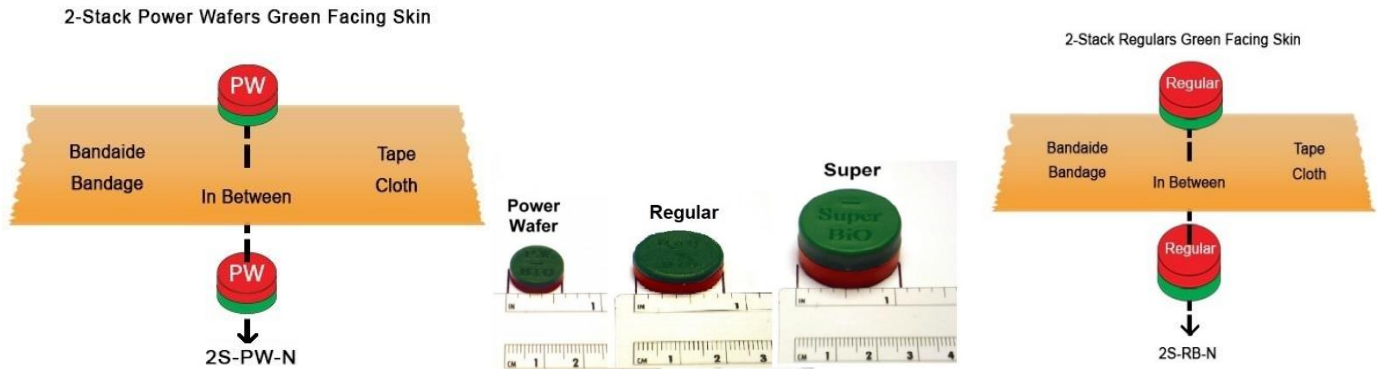

2-stack Daytime Placement: I also have the book and the kit – thank you! [Can] you can offer a very “simple” “one-and-done” protocol for the placement of a 2-stack set of “energizing” magnets on my clothes (my body) – magnets that I would then wear for a number of hours, being careful to remove them in the afternoon so as not to have problems sleeping at night.

Daytime therapy is the sternum placement that provides daily energy supplementation into the heart, bloodstream and therefore throughout the body. It helps quickly charge the body which increases vitality and maintains health and longevity.

Using the 2-stack of Power Wafers provides a field that has the penetration values necessary to reach the bloodstream of the heart. This placement is the fastest energizing point on the body. Many adults graduate to the 2-stack of

Regulars for their daily energy supplementation. **Biomagnets cannot be used with a pacemaker or defibrillator – the back of the neck placement is a safe placement.**

Most men use the 2-stack - one inside and one outside of their shirt (holding each other in place).

Most women apply it on the center strap in the front of their bra in the same manner. If the breasts hold the strap too far away from the sternum, then use a bandaide or medical tape and apply it a bit higher on the sternum.

Most people worldwide who do the Daytime [sternum] therapy, wear it during waking hours and take it off when going to bed. Wearing it from morning – to bedtime does not affect most people's sleep – often reporting and increase in sleep. If there is a problem sleeping, the Nighttime therapy of a 2-stack of Power Wafer Negative on top of the head help increase the melatonin output helping one to sleep.

Please see the Power Point under Media on the BiomagScience menu to see the other 2-stack applications, gauss and tissue penetration values. PK

Therapy Application Directions: Yes, bought the kit and playing with it, really want to know about the proper placements and despite looking at the book carefully I get confused. I'm thinking of Jerry Tennent's work and I know they arrived at it separately but he has specific meridian that I think could inform placement of the magnets

We admire Dr. Tennent's findings, but BiomagScience found cellular voltage through its own R&D and none of its therapies or protocols are based on Dr. Tennent's therapies or protocols. BiomagScience has tested various frequency modulators/generators and cannot value their response as equitable to solid-state biomagnetic results.

If you get the Wellness Kit, please review the **Blue Instant Reference Card for directions to therapies for daily vitality maintenance (wellness), Pain Relief, Advanced Therapies for Chronic Illness/Disease Malabsorption, EMF Sensitivity.**

If you have further issues, then I advise you look them up in the book's index, follow the protocols and review the diagrams if you do not know the placement. If you are stumped and do not know what to do, write us at Office@BiomagScience.Net and we will be happy to guide you. PK

Additional Biomagnets: Do you have to purchase additional magnets for some of the therapies?

Just depends. The Wellness Kit has enough Biomagnets to do the Advanced therapies and all Circuits and daily supplemental maintenance and another major therapy such as the knee.

If you need to do additional therapies such as both knees and daily supplemental maintenance, it may be required to get more Biomagnets.

Many people get the OGE kit (especially when it is on sale from the 22nd to the 3rd) for the additional Biomagnets because the Biomagnets are already discounted in the kit and it provides 6 Power wafers and 4 Regulars – more than enough to do another knee and addition therapies. PK

AFib Question for Peter: I bought a Wellness Kit to help my atrial fibrillation. I want to know which protocol I should use. Since AFib is a disorder of the nervous system of the heart, would the nervous system or circulatory system protocol be best? Or something else?

Suggest ATACC (pg 8 of Wellness Kit Pictorial Guide) to help normalize gland, organ, nerve and system function. After the OGE, use a 2-stack of Regulars Bio-Negative Green over heart for Daytime (waking hours). Term – apply till desired result – It should be noted that many people worldwide wear the Daytime (sternum)therapy every day for their daily energy supplementation.

It has been reported using it constantly has been helpful with smoothing out the heartbeat. We believe the magnetic field helps normalize the signal. PK

Alzheimer's, dementia: What about the magnets, dementia and Alzheimer's?

We have seen good results with 2-stack of Power Wafers Negative on center back of neck on skin at hair line (lower CVS) & Bio-Negative energy water. Term 24/7 for several months then continuously at least during the day. PK

Baby Steps Therapy: Is the baby step protocol in the pamphlet? If not, where can they be found?

It's in the book under Chemical sensitivity and it also comes as a separate protocol sheet in the Wellness kit. PK

BIA Instrument: How did they determine this woman's cellular voltage?

See Measure Cellular Voltage below

All voltages were taken using a BIA (Bioelectrical Impedance Analysis) machine which is a FDA registered instrument that analyzes and measures the cellular electrical values. PK

Bone on Bone regeneration?

When we learned about the herniated discs rebuilding themselves back to full height from the back circuit, it opened the window into regeneration that occurs in the Negative/Positive circuit. Subsequently we developed circuits for bone unions, nerve unions, joints (knees, elbow, shoulder, etc.) and started putting the new regeneration therapies out for testing.

At first, we were unsure if the circuits worked, but over a period of years, individuals reported reasonable and good results and sometimes no results, so we started to suggest the ATACC as the first protocol to help normalize organ, gland, nerve and system function to enhance the healing terrain, particularly help normalize enzymes and hormone outputs to support regeneration therapy – that seems to have helped – we await further response.

In 1997, we found CMO (cetyl myristoleate) worked extremely well with magnetic therapy in supporting rapid joint healing, so we added that supplement to the therapy.

We also learned that knees, due to their daily stress, took much longer to get pain relief and healing than shoulder or elbows.

A working thesis of the Circuit indicates the natural law of the two opposite energies will always reach out to meet in their pursuit of trying to reach balance.

Since the Circuit is a biological bridge connecting the two opposite energies, it appears that the electromotive energy energizes the DNA to regenerate any missing tissue to grow back to blueprint, simply so the biological bridge is repaired to fully carry the charges to meet and balance.

To say we were surprised at learning about nerve and worn/missing tissue regeneration is an understatement. However, it's been wonderful for people – especially for the quadriplegic walking again or the friend who lost and regained his feeling in his lower leg, from healing the cut nerves in his knee severed during an operation (see video under Media on site). PK

Regenerating Cartilage: How long to regenerate cartilage? I'm scheduled for knee replacement in 2 months...

The knee, due to daily weight bearing, has shown to be the longest healing term. Sometimes taking 2-3 weeks for pain relief, although individuals also report faster relief. The term varies from 4-8 weeks depending upon the individual. PK

Regenerating the cushioning between the discs: I gather this could also work on spinal discs in the neck which are missing cushioning between discs?

The Back and Whiplash Circuit has shown to support that regeneration. PK

Carpal Tunnel:I had three surgeries for carpal tunnel and ulnar (left elbow) and ended up in worse shape than before surgery. Does the wellness kit have the magnets needed to treat this situation?

There's the Carpal Tunnel Kit and protocol in the Wellness kit that has helped many others with chronic, acute and post-surgery carpal tunnel. PK4

Cervical Spondylosis: What about cervical spondylosis, can it be used?

Apply the ATACC to create a healing terrain and the Back Circuit therapy may provide the necessary support to help heal. This has helped others with ankylosing spondylosis which is very similar. PK

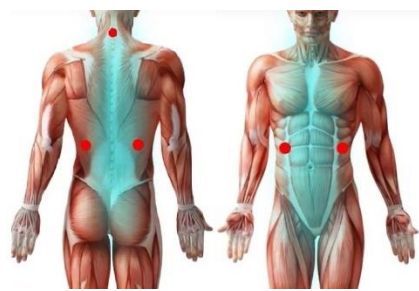

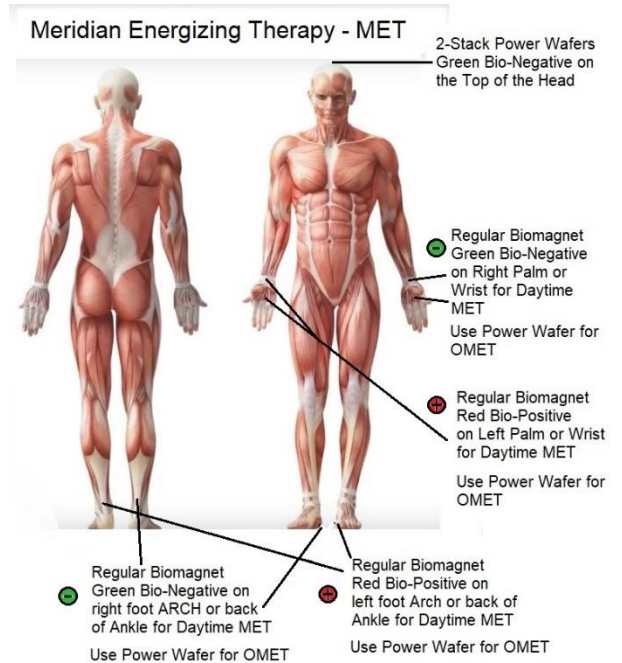

Chronic Inflammation (Unexplained) : Do the magnets help with unexplained and chronic inflammation in a knee?

Inflammation is positively charged and immediately starts to reduce upon application of the Bio-Negative field. Please review the Free Radical site before and after Bowen tests under our research. They show how immediate inflammation is reduced. PK

Circuit Therapy applications: The Circuit therapy is with 2 magnets?

Circuits employ placement of the opposite poles on both sides of the problem site. The Circuit is designed to create a biological electromotive bridge between the two opposite energy applications on both sides of the stressed, worn, traumatized, hurt area. All at-site joint, back, bone and nerve union Circuits are close enough to each other that the attraction of the poles energizes the tissue between them. As a result, the electromotive energy of the poles activates any missing tissue to regenerate back to blueprint, to complete the biological bridge, so the energy can flow freely to meet and balance.

This is also true of the System Circuit Therapy known as the MET (Meridian Energizing Therapy). Placed on the 5 peripheral points of the body (feet, hands, head), it energizes the nervous system in support of energizing and balancing the whole body. It has been useful for creating major healing support for many conditions and is subsequently applied after the OGE (Organ Group Energizing) therapy used in the Advanced Therapies (ATACC).

The OGE is the first therapy protocol of the ATACC. It is placed around the body at the level of the key organs and on the neck. The OGE helps normalize organ and gland function all at the same time. Since they all operate in symphony, the OGE has shown to have remarkable results such as waking up a 91-year-old man who was terminating from a septic shock coma from his kidneys shutting down after 10 years of dialysis. Instead of terminating, he woke up 3 days after the application and his kidneys had healed and he did not need dialysis any longer – an amazing and remarkable therapy.

Once the OGE of the ATACC therapy is completed, the MET is applied to energize and balance the rest of the body. The ATACC is part of the systemic Circuit Therapy that helps the body heal and normalize.

Please always apply the stated proper Biomagnet placement. For a view of the various 2-stack and Circuit applications, see the Slide Show under Media on the BiomagScience menu and the application pictures in the Wellness Kit Pictorial Guide. PK

Cetyl Myristoleate: What's that supplement he just mentioned?

During the years I belonged to the International Tesla Society, the Society was carrying CMO (Cetyl Myristoleate) and I found out about its supplemental support in helping rapidly rebuild connective tissue. Subsequently we tested it under magnetic therapy influence and the response was a faster increase in pain relief and tissue regeneration. As a result, we have been suggesting its supplementation for all joint and connective tissue therapy for years with good reports of its benefits. PK.

Compass Pointer: If you place a compass perpendicular to the green side of your magnet which pole of the compass would point to that green side - north or south.

The compass points at the Bio-Negative North pole of the magnet also points to the Geo North pole of the earth. Since the compass is actually the opposite (seeking) pole that is attracted to the earth's opposite pole, to stop the confusion about the seeking pole, BiomagScience has joined the scientific covenant to address the poles by their electromotive force: Positive or Negative producing.

So all Biomagnets are tested with a magnetometer and gaussmeter to their Negative and Positive poles so that there is no confusion about the poles.

Since the energy in physiology is also measured in electromotive terms, BiomagScience teaches energy therapy through the Negative and Positive voltage. FYI, True Geo North produces Negative electromotive energy and True Geo South produces Positive electromagnetic energy. PK

Energized Water vs: Hydrogen Supplements: What is the relationship between the “energized water” that your magnets are creating and the Hydrogen-Enriched Water that is created when you drop “hydrogen-enriched water tablets” into it?

Both provide increased hydrogen ions to the body, particularly to the glands and organs which without supplementation, run slightly hypo-active.

Water naturally forms chemical associations which are molecular clusters. The body is unable to fully process the interior of the molecular clusters and therefore the unprocessed clusters cannot fully release the body's hydrogen requirement which deprives the glands and organs to operate fully.

Energizing the electrons of the water's molecules gives them the repelling charge which breaks up the clusters allowing the body to fully process its hydrogen requirements.

The supplements cost money - the one-time purchase of water magnets provides a lifetime of healthy energized water.

The OHNO Institute, a research group devoted to studying energy water from magnets, Lourdes France, Hunza Pakistan, and other sources from geo-magnetic formations where the water is naturally energized, found that many middle-aged people start to manifest various health conditions because of the chronic lack of hydrogen in their glands and organs from normal water. When introduced to Energy water, many of the conditions resolved indicating the key reason why so many people get the “magic” water from Lourdes or Hunza for its healing properties.

BiomagScience offers simple, inexpensive water magnets to produce a lifetime of unlimited Bio-Negative energy water. Based on a cost basis and its natural method, it is a lot easier and cheaper to drink the energy water than buy the supplements. In addition, people always remark how much better tasting the energized water is – what they are tasting is the energy change in the atomic structure of the water. PK

Bathtub - Magnets fit the bathtub spigot?

Yes, the Cold Line Bio-Negative Energizer fits the bathtub spigot, shower head and all cold lines under the sink – goes on in a couple minutes with tie straps. PK

Energy Water Lose Charge: Can energized water be boiled for tea and does it lose the charge?

Yes, it will lose some of its charge when boiled, but not all of it; however, you can re-energize it back to full energy if you put a Water Jar Energizer on the side of the cup and stir it with a spoon for 10 seconds. PK

Energized Water with filters: Does the water energizer work well with shower head filters, distilled or filtered water?

Yes, all liquids have electrons which can be energized and it has been used on these devices successfully for years. PK

Energized Water, BiomagScience Activated Oxygen: Is energized water from magnet the same as Activated Oxygen?

No, one is oxygen, the other is Bio-Negatively charged water and each has its own benefits. However, they work well together in rapidly delivering their benefits to the body. PK

Hard Water: Does putting a magnet in the shower, rid hard water?

If you want to soften water, go to BiomagScience's sister company EnviroMagnetics.Net and get the Positive charged Water Softener which provides soft water for the plumbing.

The Bio-Negative is not designed to go on the whole house plumbing. Biologically, Negative water is best for humans, but will make the water hard if installed on the whole plumbing system, but does not make it hard installed at the faucet or shower/tub.

The EnviroMagnetics Hard Water Softener system is approximately 28 times stronger than the Cold Line Energizer. This is the required power to guarantee soft water. Many people use both systems; Bio-Negative for their health and the EnviroMagnetics softener for their plumbing's health. PK

Energy Water with Shungite Stones: can we use the magnet with a water jar with Shungite stones ?

Yes, sure, why not. They can work together and amplify the energy. PK

Fat, Visceral: Will they help reduce visceral fat

People have reported the weight reduction therapy in the *Conquering Pain* book successfully helped lose weight. It involves using both Positive and Negative applications over the colon to promote peristalsis. Please review the protocol. PK

Glaucoma: In the A-Z therapy index of *Conquering Pain Book, The Art of Healing with Biomagnetism*, under glaucoma, it calls for Bio-Negative placement on the temple at the end of the eye socket, back of the neck to vasodilate the blood brain barrier to increase circulation to the eyes, energy water (for increased hydrogen ions) with our liquid oxygen to increase blood oxygen % during the therapy. People have reported positive results including lowering the pressure overnight. PK

Grounding: How does this compare to grounding

Both introduce negative healing energy into the body. Grounding provides a small amount of electromotive energy while strong magnets provide a large amount of Bio-Negative energy; the power difference between a Corvette and a Volkswagen - a big difference.

There are several issues to be aware of with grounding: It should have its own ground and not to the electric system because of the approximate 40V back surge whenever a motor, like the refrigerator, washers, heater, air conditioners, fans start. The electromotive back surge up the electrical ground is not good for the body.

In addition, even with the proper ground, your body becomes the grounded antenna for any extraneous EMF, so make sure there is no EMF output in your bedroom – a good idea anyway.

A good medical magnet is so much safer, stronger, easier and more specific [if applicable] than grounding. Really no comparison when looking at all the factors. PK

Gut health!

Nominally the ATACC (Advanced Therapies for Acute Chronic Conditions - on page 8 of the Wellness Kit Pictorial Guide) and a high dose liposomal Vitamin C for 10 days to provide mass dose of donor electrons to support healing is recommended to help normalize gland/organ/system function to create a healing terrain.

Then a 2 week supplementation term to rebuild the gut flora with a professional grade Probiotic such as THERBIOTIC from Klaire labs which comes in a cold pack to keep it properly alive. PK

Herniated discs:

Back in the mid 90's, a Retired Master Sergeant Nurse came to us with several approximately 18% herniated discs asking for pain relief. As she had been in an operating room when the patient came out paraplegic, she would not go under the knife. We suggested the Back Circuit Therapy.

It helped her with the pain, and she wore them for approximately 8 weeks until the pain stopped with the Biomagnets off. She took X-rays before and after and she told us that unbelievably, her discs had grown back to full height. She sent us the X-rays, but were lost in shipping and it was nigh to impossible to get another copy. But as indicated previously in the text, her finding gave us the impetus to develop other regeneration circuits to help heal joints and regenerate all types of tissue. PK.

Lupus: Have you used the magnets for someone who has been diagnosed with lupus?

We have had excellent and rapid results with Lupus. Our thesis is that Lupus is a low cellular voltage condition that falls into the category of a weak gene reception - only receives and transcribes a partial genetic code resulting as lupus.

In physics, up-spin Positive energy expands like inflammation and Negative energy creates down-spin or contraction and is the energy that heals the body and reduces inflammation.

It appears that the individuals who have lupus have a reduced cellular energy that does not affect most people. Their overall lower cellular voltage allows the bridge length to increase between the transmitter and receptor sites by the reduced energy down-spin of the lower voltage.

The code signal is made up of so many different coding elements. When the signal is degraded and it has to travel further to the receptor site, it is felt that only part of the code is received and that is what is transcribed in the cell which results in manifesting lupus.

This analysis is based on the result of acute lupus cases (in the hospital 2 weeks out of the month) becoming asymptomatic in a month of rebuilding the cellular voltage to high normal.

When energizing with Bio-Negative energy and increasing the cellular voltage to high normal, the downspin from the increased Bio-Negative cellular voltage, shortens the bridge-lengths and increases the signal amplitude, both of which deliver the full genetic code/transcription and the lupus goes away.

Biomagnetic therapy is a boon for those with lupus. For results, see Lupus under Health conditions. PK

Measure Cellular Voltage: Is there an easy way for lay folks to measure cellular voltage with the use of magnets?

We do not know any way other than using the BIA (Bioelectrical Impedance Analysis) instrument. To use it, one should be certified in physiology, and trained in how to use it. Many users (Naturopaths, researchers, and nurse/practitioners) often use it along with dark-field microscopy to review blood for cellular analysis and therapy response; most practitioners do not use it.

The BIA was an essential measuring tool for BiomagScience to establish and confirm consistent, scientific before and after results in developing its therapies; providing an immediate snap-shot to see the results of therapy applications. For BiomagScience clinical testing, see BIA under Research @ BiomagScience.Net.

At the time, unless you are doing research and have the funding and time to learn the BIA instrument, we see no need in general caregiving. Although it can measure the progress of a therapy, we have already used it in testing and establishing the therapies that provide the increased energy that supports rapid healing and maintains wellness. PK

Voltage Measurement/Danger of Biomagnets: I think we would all feel a little more comfortable were we to have a way to measure the voltage. These magnets are potentially very healing and also, apparently, potentially quite harmful...

It's true, improperly marked biomagnets can be dangerous. That is the benefit of getting properly marked certified medical biomagnets and scientifically designed therapies – the worry has been taken out of it.

BiomagScience biomagnets are certified, color-coded medical biomagnets. Their use with BiomagScience therapy protocols is very exacting and follows the correct energy flow in the body at the macro and micro level. None of the therapies have any contraindications.

Measuring Voltage measurement is simply not needed to determine term or overcharging. It is useful for the research practitioner, but not a need for general care. BiomagScience has thousands of clients worldwide who have successfully used BiomagScience protocols without any issues. If you include the Chinese who put the *Conquering Pain* book in Mandarin years ago and use it in their practice and teachings, that number runs to the millions.

If you have any questions, it is best to email Office@BiomagScience.Net and we will reply ASAP. PK

Nikken Products: I have a friend who sells Nikken magnetic products and is always trying to get me to use her products. Are you familiar with these products and if you are, is there any comparison with your magnets?

In summary, after many years of Nikken selling Aggregate Positive [inflammation causing and pain] field biomagnets and BiomagScience's experience below, we stopped paying attention to Nikken's non-scientifically

designed magnetic therapy devices. We have heard mutterings that Nikken has progressed their technology, but BiomagScience has been too busy developing and instituting protocols such as nerve regeneration circuits, EHS Baby Steps therapy and many other therapies, to pay any further interest in Nikken.

One very deciding experience with Nikken was in 1998. While working in the California, a woman was brought to us who wanted to commit suicide because her acute pain; someone was constantly with her to keep her from killing herself. We pinpointed the problem immediately: she had purchased a +\$2000 Nikken bed and a lot of the magnets were Positive Facing her body. Positive causes and/or increases inflammation. Once we established the problem, she stopped using it and we gave her the proper energy support and she was normal in a little over a week.

For years, Nikken sold improper field biomagnets which could help stiff muscles momentarily, but otherwise was causing stress and further inflammation. In addition, they were publishing and using thermal prints of painful areas becoming more red (heating up and increasing the inflammation), as though that was a good response and a good reason to buy their Aggregate Positive biomagnetic devices and beds – just the worst.

At one time, they also infringed on my water softener patent. But they knew so little about the science, they didn't know how to apply it – so I left it alone and it failed.

I have subsequently heard that they have corrected some of their products, but I am not interested in anything Nikken does. PK

PAIR Biomagnetics: What do you think about Biomagnetic Pair Therapy (Dr. Garcia/Dr. Goiz)?

Our jury is out on Pair Biomagnetics. A personal therapy experience with Dr. Garcia and our professional experience with post-PAIR-therapy individuals who contacted us after no response or acute disorientation and increased symptoms has made us question the therapy.

Dr. Garcia joined the staff of the clinic I went to for my own health. Since the clinic also sold my book, Dr. Garcia approached me asking if something came up, would I be open to his applying PAIR therapy on me. I said yes as I was very interested in PAIR as another solid-state (static field) therapy that would support healing.

Subsequently, a bursar issue occurred in my left shoulder lifting my arm. So, I went to him instead of doing my own therapy. He placed magnets on my left anterior cuff and over the mid-right lobe of the liver. I asked him what poles and why, which he ignored indicating he would be back in 15 minutes, came back, no response (still hurt lifting my arm), reversed the polarities, and then came back 15 minutes later – still no response. He was disappointed; I wasn't because it takes longer than 30 minutes to get a fair response, but he seemed to think it would only take 15 minutes. I did not however, understand the Circuitplacement over the liver and anterior cuff – didn't make sense; nor why he would use Positive, which increases inflammation, over the pain site.

When he sat down to show me his material, I questioned the various pole use, the 2 place Circuit and suddenly realized he knew nothing about the Positive or Negative polarity tissue response – only just apply the opposite colors of the magnets on 2 points (PAIR) in his guide in no particular order and if that did not work, just reverse them; I was a bit taken back, especially since this is the guy who teaches the program.

Now it made sense why the individuals who had contacted us after their PAIR therapy, did not get results – there was no direct use of Bio-Negative energy to start reducing the inflammation and normalizing the cellular charges.

In the cases of the acutely disoriented individuals, whose illness had increased because of PAIR, these individuals had malabsorption and the full magnetic power therapy overcharged their fragile systems creating an acute, chronic Herxheimer event by lowering their cellular voltage into brain fog, increased inflammation and pain. PAIR teaching apparently is not cognizant of the lite energy induction requirement for malabsorption to increase the cellular voltage carefully without acute Herxing.

Fortunately, our normal protocols and our malabsorption “Baby Steps” therapy helped the individuals who contacted us. At the time, I just applied the standard Bio-Negative to the shoulder and it was fine by the end of the day – wasn’t acute – didn’t need the Circuit.

I have subsequently reviewed Dr. Garcia’s work in Facebook while he started learning the poles and started using [the Broeringmeyer method] kinesiologic testing I teach practitioners in the *Conquering Pain* book.

PAIR’s stated working mechanism indicates that the circuits create an alkaline channel that helps heal the condition. I cannot find any science that supports a separate alkaline channel that can be instantly created in the middle of another systemic pH biochemistry.

At this time, I am unable to provide any supporting statement of PAIR efficacy. PK

PAIR Remote Healing: Hello - for a few months I am been receive bio magnet sessions remotely (Mexico - Canada) focusing on glaucoma and - I can’t report direct benefit other than deep relaxation.

No comment – we do not do remote Biomagnetism. I understand PAIR magnets teach that. I had a practitioner student who decided to study PAIR, then came back and said she was remote testing me and that I had the bubonic plaque and a bunch of other viruses living in me. Coupled with the personal and professional experience, I haven’t had much interest in PAIR remote healing since. PK

Prostate: Using a 2-stack of Regulars inside and outside the underwear Negative against the prostate has helped normalize urine control, better flow and with the use of the Super Biomagnet (the large BiomagScience medical magnet) reducing large prostate tumors. PK.

Prosthetics and Biomagnets: I have friends with rods in their back, will magnets help?

The Biomagnet provides pain relief from the back rod prothesis. Biomagnets have proven to provide pain relief and rapid healing with all prothesis including joint replacement.

One case in point: 72-year-old male was in accident which crushed both knees and splintered both legs from the knees down to the ankles. That was at the end of October. After a week of surgeries implementing rods and metal screwing together his legs and knees, the doctor explained that he would not be able to have an weight bearing until August when he would start to learn how to walk again.

As an educated colleague in BiomagScience, he placed the Bio-Negative energy on the front of the left leg and the back of the right leg in the Negative meridians. He did not need any pain medicine and was walking normally by the 3rd week of January.

This was 4 times faster healing due to the amplified Negative energy applied correctly. PK

Silica/Clay /bone density facilitates the flow of energy for healing?

Not our purview. PK

Stroke: If the 2-stack of Power Wafers Green Bio-Negative can be applied on the back of the neck on the skin at the hair line ASAP after the stroke, rapid healing without loss of function has occurred.

The BRT (Brain Re-Entrainment Therapy) is supportive for healing the brain from stroke.

The MET is supportive healing for rebuilding nerve pathways of post-stroke issues to help normalize nerve/movement function/control. This was shown with the 20-year term middle aged quadriplegic, working the MET on daily basis walking again after 9 months. Other individuals have been helped correct post-stroke communication, arm and walking movement. PK

Trigger Point Applications: Where do you find Energy Practitioners for trigger point application?

BiomagScience does not do trigger point magnetics which is not a DIY technology – requires extensive education and does not include many of the at-site or systemic therapies needed for regeneration or supportive healing. BiomagScience protocols were designed for anyone to do in in the comfort of their own home. PK

Vaccine injured - Would this help?

The ATACC helps energize the body to help increase immune function for wellness and overcoming illness from all causes.

Then a therapy continuation of a 2-stack of Regulars Bio-Negative green over the heart Daytime for the stated therapy term.

Supplementation of 10 grams of good liposomal Vitamin C – a virucide and bactericide (providing high dosage of donor electrons) taken within 20 minutes for load dosing has shown rapid healing support.

If easier: take 5 grams at once and then 20 minutes later the other 5 grams – just make sure to take all 10 grams within the 20-minute load-dosing period.

It's recommended to take each the Vitamin C with full glass of Bio-negative Energy water + 30 drops liquid oxygen (so 2 full glasses). Do this therapy for 10 days, then back down to 5 grams a day for a week, then 1.5 grams daily as maintenance along with Daytime therapy and Energy water throughout day.

This has helped individuals with long-haul covid and co-infections from other high viral/bacterial population long haul conditions.

It helped an individual with chronic, very acute shingles who could not stand, sit or rest and in complete agony to be able to rest within days and become asymptomatic in 10 days.

If it's available to you, it is recommended to get a Vitamin C IV of at least 50g a day for 2 days in a row with a professional who knows to add the correct constituents with the VC. This supplemental therapy has shown to help overcome the illness immediately. PK

Conclusion

For years, BiomagScience has worked with clients, and all types of practitioners (MDs, dentists, Chiropractors, etc.), clinics, medical colleges/universities, and hospitals internationally in developing and applying therapy protocols for the proper response. These therapies are exact and specific to the application, size of Biomagnet (tissue penetration value requirement) and general term depending upon the condition.

For more information, please review the BiomagScience site, its research and results under Health Conditions. If what you are looking for is not there, please contact us and we will try to provide the information ASAP.

Respectfully submitted by,

Peter Kulish, Founder
BiomagScience

In response to Dr. Harshfield's comments below, BiomagScience has been providing therapies for over 180 A-Z simple to complex medical conditions for years and although the research goes back to 1979, many of these protocols have been successfully used internationally since 1992; with many therapy protocol updates maturing since and Circuit therapies and advanced therapies being introduced in 1996 and 2006. Again, its therapies and protocols are very exacting with specifically designed magnetic field for terms learned through the years.

Regarding Dr. Harshfield's comment on the "flow of red blood cells in the skeletal muscle capillaries exposed to strong static magnetic fields has been reported to be reduced" it sounds like the electromotive stress that occurs when either the wrong pole is being applied or the Negative pole is being applied in the Positive limb meridian. PK

Joy: Just fyi, some of Dr. Harshfield's comments to the chat during the webinar

Dr Hharshfield:

Static Magnetic Field Therapy: A Critical Review of Treatment Parameters
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2686626/>

Dr. Harshfield:

The use of neodymium magnets in healthcare and their effects on health
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6323575/>

Dr. Harshfield:

NASA uses neodymium magnets to maintain the muscular tonus of astronauts during space flights

Dr. Harshfield:

The flow of red blood cells in the skeletal muscle capillaries exposed to strong static magnetic fields has been reported to be reduced. The magnetic field generated by neodymium magnets is thought to increase microcirculation but the effects on this are not clearly known.

Dr. Harshfield:

Electronic devices are being increasingly used in our lives. Fossil fuels are being replaced by renewable energies, a field that increasingly uses rare earth elements. These elements are used in electric cars and wind turbines. Although procurement challenges and high prices lead producers to seek alternatives, rare earth elements are still being used in numerous technology and Because of their demand, the health effects of these powerful magnets must be addressed along with their environmental impacts.
