

### CLIP 13

Bone on Bone Therapy | Reiki | Polarity Medicine  
Positive + Negative Meridians | Energy Medicine

**[Peter Kulish]**

Are there any questions that people would like to go over right now?

**[Joy]**

Yes, a lot of questions have come in and I also see some hands being raised. So Doris, go ahead. Your hand is raised.

**[Doris]**

Yes. I want to know, did I miss the **bone on bone therapy**?

**[Peter Kulish]**

Well, OK, we can go there.

This is on the right side, the right upper picture, how the magnets go. Oh, what happened, Because, well, you know, this is, what's the primary importance

And I'm going to go back here first. Hold on, here we go. Years ago, while I questioned it at first, when I first got into this business, that I saw several places where they said the authors of the therapies that said, well, put it on if it hurts, if it starts to hurt, take it off, give it some time, then put it back on.

That didn't make any sense to me. So then I started talking about it and I was led to seeing **Reiki** and then **polarity medicine** and realizing that the limbs on the body, they have meridians, one's **positive** and one's **negative**. Well, if you study electricity, you don't put negative on positive. You don't put positive on negative. It causes stress.

And in studying **energy medicine**, I realized that we had to work with the **meridians of the body** in order to **amplify the flow of healing energy** correctly.

And the way it is, is that in the anatomical view, which let me just go up here. This is a better slide. The one on the left is the anatomical view.

That's the thumbs out, palms forward. And the left front, left anterior arm and hand up to the rotator cuff. And the front of the left leg is negative charged.
